## INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/AU2004/000756

Box No. I Basis of the report					
1. With regard to the language, this report is based on the international application in the language in which it was filed, unless otherwise indicated under this item.					
This report is based on translations from the original language into the following language which is the language of a translation furnished for the purposes of:					
international search (under Rules 12.3 and 23.1 (b))	· · · · · · · · · · · · · · · · · · ·				
publication of the international application (under Rule 12.4)	publication of the international application (under Rule 12.4)				
international preliminary examination (under Rules 55.2 and/or 55.3)					
2. With regard to the elements of the international application, this report is based on (replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report):					
the international application as originally filed/furnished					
the description:					
pages as originally filed/furnished  pages* received by this Authority on with the letter of					
pages* received by this Authority on with the letter of pages* received by this Authority on with the letter of					
the claims:					
pages as originally filed/furnished					
pages* as amended (together with any statement) under Article 19					
pages* received by this Authority on with the letter of pages* received by this Authority on with the letter of					
pages* received by this Authority on with the letter of the drawings:					
pages as originally filed/furnished					
pages* received by this Authority on with the letter of					
pages* received by this Authority on with the letter of					
a sequence listing and/or any related table(s) - see Supplemental Box Relating to Sequence Listing.					
3. The amendments have resulted in the cancellation of:					
the description, pages					
the claims, Nos.					
the drawings, sheets/figs					
the sequence listing (specify):					
any table(s) related to the sequence listing (specify):					
4. This report has been established as if (some of) the amendments annexed to this report and listed below had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).					
the description, pages					
the claims, Nos.					
the drawings, sheets/figs					
the sequence listing (specify):					
-					
any table(s) related to the sequence listing (specify):					
If item 4 applies, some or all of those sheets may be marked "superseded."

D5) US 3999634

#### NOVELTY

None of the documents cited in the international search report discloses a fluid cooled wet brake system as claimed. The claimed invention is therefore novel.

### **INVENTIVE STEP**

Citation D5 discloses a wet brake system in which the stator is provided with internal fluid flow paths through which the lubricating liquid contained in the housing flows. The claimed invention differs from this prior art in that a separate cooling fluid flows through the stator. Each of citation D1-D4 discloses a braking system in which a cooling fluid flows through the stator. It would be obvious to a skilled addressee to combine the disclosure of any one of citations D1-D4 with that of D5 and thereby arrive at the claimed invention.

Furthermore appended claims 2-10 add only features that are either disclosed in these citations or are common general knowledge in the art and which therefore cannot contribute to patentable invention.

Claims 1-10 therefore lack an inventive step.
